2. It has double layers of the pits.
3. More usages.
4. aperture of DVD is 0.6

while it's waiting to be transferred to another.

2.2.9

DTP Software :-

Desktop publishing software is a tool for graphic designers and non-designers to create visual communications such as brochures, web pages, posters, business cards, greeting cards and more for professional publishing.

Programs such as Adobe InDesign, Microsoft Publisher, QuarkXPress, Serif PagePlus are the examples of Desktop publishing software. Some of these are used by the professional graphic designers and commercial printing technicians and some of these are used by the teachers, students, small business owners and non-designers.
